

Inspired by past social movements, Smart Skip Life began in 2021, when a singular moment evolved into a complete movement. We each sometimes want a Skip, a jump over obstacles, at the right time! As a result, we should never draw a line in learning something new, for ourselves and for our environment! The sooner, the better! Thus! Let's move from a simple Smart Skip Homework to a smart and impactful life, to a Smart Skip Life! We do not have our own headquarters or a default team! Just a dream and a strong will that pushes us forward! Our education movement challenges the status quo, fighting for solutions that transform society.

This is a non-profit initiative, all for the correct information of people, to gather all the information that matters at a click away, to disseminate it correctly and to create a domino effect in helping, towards a better future! Help support this project! Everything turns for the better!
